Tabbing & Labeling Solutions

With over 45 years of knowledge and experience, Buskro has become the trusted specialist in inkjet systems.

Purpose-Built for
Performance & Flexibility

Buskro's BK730 Tabber and BK731 Labeller are high-performance modules that automate critical labeling and tabbing operations across a wide range of industries. These systems help maximize throughput, improve accuracy, and ensure regulatory compliance — whether integrated into a larger workflow or used as standalone stations.

Applications & Use Cases

Mailing & Document Finishing

Apply postal-compliant wafer seals on folded self-mailers

Single or multiple tabs with edge detection

Postal automation compatibility for both USPS and Canada Post standards

Product Labeling

Brand and security label application on cartons, pouches, and sleeves

Support for paper, clear, or translucent labels

Integration-ready with print-and-apply workflows

Variable Data Solutions

Combine with inkjet print modules for on-the-fly barcode, QR code, and text printing

Label and mark serialized items in one seamless motion

Perfect for serialized packaging or logistics coding

Real-World Use Case:
Secure Carton Labeling Application

A Buskro box/carton printing and labeling system is used to process fiberboard cartons for an automotive manufacturer. A vacuum-assisted friction feeder dispenses KDF boxes. A BK731 Labeler applies brand security labels, which are printed on using a BK2540 Aurora UV print system. The images are verified, and non-conforming boxes are diverted automatically.

Specifications

BK730

Model #	BK730	BK730WL
Tab Specifications		
Width	Up to 3" (76mm)	Up to 5" (127mm)
Length	0.5" to 7" (13mm to 178mm)	
Number of Tabs/piece	1, 2, or 3	
Roll Size	Up to 50,000 pcs (based on 3/4" tab)	
Core Diameter	3.0" (76.2mm)	
Spool Size	19.75" (502mm) max.	
Substrates	Clear, paper, tramslucent	
Placement	Left, right, or flat tab	
Physical		
Length c/w unwind & rewind spools	32.2" (818mm)	
Height c/w unwind & rewind spools	37.6" (955mm)	
Overall width	14.1" (358mm)	

Number of Labels   1, 2, or 3

Label Specifications

Label Roll Size	Up to 50,000 – 3/4" (paper)	
Label Core Diameter	3.00"	76.2mm
Lavel Spool Size	19.75"	502mm
Label Length	1/2" to 7.0"	12.7mm to 51mm
Label Width	Up to 3"	76mm
Label Style	Circle, square, rectangle stamps	
Label Type	Clear (c/w engineered backer), Paper, Translucent	
Label Placement	Front, back, or fl at label (gate fold)	

Features

» Fast, easy setup and changeover

» Automatic controls eliminate guesswork

» Apply labels and tabs up to 7" (178mm) long

» Portability: self-contained controls in the tabbing head

» Placement accuracy at high speeds, up to 35,000 pph for single tabs (up to 1")

» Modular designs lets you place the tabber/labeller at any point in the production line

» Automatic backer sensing

» Production counters and displays

» Error reporting

» Transport base interlocking for system stoppage

» Peel-off and scratch-off label applications are available

Why Choose Buskro?

Modular Design: Systems adapt to your evolving needs

Scalable Technology: Add-on printers, scanners, and encoders as needed

Software Integration: Compose IQ + external database compatibility

Proven Track Record: Deployed in mailshops, manufacturing lines, logistics centers, and secure packaging lines worldwide

Standalone or Inline: *You Choose*

Mailing & Document Finishing
- Apply postal-compliant wafer seals on folded self-mailers
- Single or multiple tabs with edge detection
- Postal automation compatibility for both USPS and Canada Post standards

Product Labeling
- Brand and security label application on cartons, pouches, and sleeves
- Support for paper, clear, or translucent labels
- Integration-ready with print-and-apply workflows

Variable Data Solutions
- Combine with inkjet print modules for on-the-fly barcode, QR code, and text printing
- Label and mark serialized items in one seamless motion
- Perfect for serialized packaging or logistics coding

Your Application, Our Solution

If your challenge involves product identification, regulatory compliance, traceability, or brand security—Buskro's tabbing and labeling solutions are your answer. Configurable, scalable, and proven across industries, our systems adapt to your needs today and evolve with you tomorrow.
