

Buskro and OneStop RFID Announce Strategic Partnership to Expand RFID Solutions for Packaging, Labeling, and Industrial Applications

Pickering, Ontario — Buskro Ltd., a leading provider of digital inkjet printing, labeling, and material handling solutions, is pleased to announce a strategic partnership with OneStop RFID, a technology company specializing in RFID encoding and control software, hardware, and integrated RFID solutions. This collaboration will enable customers to add digital identification to their products and deploy fully integrated printing and RFID encoding systems designed to improve traceability, automation, and supply chain visibility.

Through this partnership, Buskro's advanced inkjet printing and transport platforms will be combined with OneStop RFID's comprehensive portfolio of RFID solutions including readers, antennas, control and encoding technologies. Together, the companies will deliver turnkey systems capable of printing, encoding, verifying, and applying RFID-enabled labels and packaging across a wide range of industries including logistics, pharmaceutical, manufacturing, retail, and direct mail.

"RFID adoption is accelerating across packaging, logistics, and retail. Partnering with OneStop RFID allows us to provide customers with complete RFID-enabled production solutions - from tag supply and hardware to high-speed printing, encoding, and inspection."

OneStop RFID brings extensive expertise in RFID technology development including software, RFID tags, readers, antennas, and auxiliary equipment enabling IoT integration solutions. Their products support applications such as inventory management, asset tracking, authentication, and supply chain automation.

"By partnering with Buskro, we can help manufacturers and converters integrate high speed printing solutions, fully embedded with our RFID control and encoding technologies, directly into their production and labeling lines. This collaboration enables companies to move beyond manual tagging processes and implement scalable, automated RFID workflows."

The partnership will focus initially on North American markets, with plans to support customers globally through integrated solutions, system design, and application support.

About Buskro

Buskro Ltd. is a global provider of industrial inkjet printing, material handling, labeling, and automation systems. Serving industries including packaging, direct mail, labeling, and card personalization, Buskro delivers modular solutions that integrate printing, encoding, inspection, and finishing technologies.

About OneStop RFID

OneStop RFID is a leading RFID solutions provider for product digital identification at the item level. They develop, supply and integrate software and hardware, as well as providing auxiliary equipment including conveyors, readers, antennas, encoded labels and more. Their product portfolio enables full product visibility and the use of IoT-enabled RFID technologies supporting a wide range of industrial and commercial applications.
